Marxism in higher education

Danger of taking the threat from the Left too seriously

The Conservative chairman of an inter-London branch's education committee, bewildered by the metamorphosis of the local college of technology into an embryonic polytechnic, once remarked: "Socialism, social work, socialism—it's all the same thing." As a distinguished professor of sociology, Professor Julius Gould, the author of *The Attack on Higher Education*, can hardly accept the wording of this rather crude, but expressive, formula. But he and his colleagues do at times in their pamphlet seem to sympathize with the spirit behind it.

There are three fundamental failures in Professor Gould's study of Marxist penetration into higher education, which was published this week by the Institute for the Study of Conflict. First, it fails to identify adequately who precisely is trying to subvert our academic and cultural institutions. Secondly, it fails to convince the uncommitted that there is a threat on the scale he and his colleagues suggest. Finally, it fails to suggest what should be done to combat this Marxist menace if it does exist.

On the first point the subtitle of the pamphlet—*Marxism and Radical Penetration* (four italics)—reveals this failure of definition. Obviously in the view of the study group all Marxists are not Marxists; nor are all Marxists who are subversive in different ways and at different levels of sophistication. So to be sure of hitting their target Professor Gould and his colleagues employ the technique of the blanket-bomb. But it is just not good enough to justify this by saying that Marxists are sometimes "crazy" about revealing their true loyalties.

It is even sensible, let alone scientific, to lump together David Harvey, author of *Social Justice and the City*, F. D. Young, the Campaigner for Academic Freedom and Democracy, the new president of the National Union of Students, Community Development

Projects, Case Con, the magazine of radical social workers, and many others? Here the study group seems to be indulging in precisely the same crude but suggestive oversimplification of which they accuse their opponents.

The second objection to Professor Gould's analysis arises from the first. Just as it is not always clear who precisely is being incensed so there is a lack of definition about the charges. He suggests that "selected university departments have fallen squarely into the hands of Marxist hands" but fails to say which these are or indeed how many have been captured by the Left in this way. Again, he suggests that these extremists "rely, like any other network, upon mutual support with the making of appointments" which hardly seems surprising.

Indeed when all the ambiguity and qualifications are removed and the rather more dramatic, even lurid, prose is discounted, all that is really being said is that some departments in universities and polytechnics have a strong left-wing character. Surely this is nothing more than part of the desirable diversity of the academic world. After all, there are many departments with a strong right-wing character as well. No sensible person supposes that the values that inform, say, Nuffield and All Souls at Oxford are the same; no civilized defender of a pluralistic academic tradition would consider it desirable that they should be.

Has cannot be eradicated from higher education, the same time saying the vitality of its intellectual life. Puritanism, Whiggery, clericalism, all seemed in their day self-contained systems of values with ambitions in intellectual monopoly, as Marxism appears today in Professor Gould and his colleagues. Yet it was their influence, and the reactions they provoked, which produced the academic tradition which he now urges us to defend.

What is important surely is the balance of bias—a well-kept principle that since weighed Anglican King's College in the Strand against that Godless institution in Tower Street, Professor Gould claims there is "something clearly disproportionate in the strength of the extreme Left in the educational world" but as he has failed both to identify the "extreme Left" or to give any quantitative measure of its strength it is difficult to judge the accuracy of his claim. It is just as possible that the present surfeit of the Marxist is a recognition of their insecurity in face of a liberal majority as an indication of their awareness as "the long march through the institutions" triumphantly proceeds.

The third failure is perhaps the most easy to forgive. We are told that we must understand how wrong the radicals are first in what they say and then in what they do. This is not difficult. Most people in higher education are not hard-line Marxists or indeed Marxists at all and they recoil from the kind of vulgar clichés derived from Marx that pass for learning in a few departments in certain disciplines. Nor is it news that the extreme Left must distinguish for its respect for constitutional democracy.

But we are not told what we must do. Yet if the threat to intellectual pluralism is as great and as imminent as the study group suggests, surely something positive must be done to meet it. In one sense it may be a tribute to the liberalism, however short-tempered, of Professor Gould and his colleagues that they do suggest this. It is not that such restrictive measures strengthen the cause of their opponents. Perhaps they realize that such measures are incompatible with a sense of liberty, academic or political; that to fabric their opponents with such weapons is to join them.

However, this pamphlet is a potent

tutorial to the prejudices of the press, is likely to receive wide publicity. As a form of intimidation, not for an extreme Left which perhaps detests it, which does not. The real target of the pamphlet is not the radical target of the Left, but the Higher Education Unit, the Marxist Centre which allegedly is making such a defence of liberal values.

Here perhaps Professor Gould has a point to make. It is the decay of a centre which has allowed more radical, declining in the self-confidence of the wing Institute for the Study of Social Change to be taken more seriously. Professor Gould obviously feels that the first of the two phenomena is much more important than the second: The *Times* believes that a rather way round.

The demoralization of the centre is in understanding. The death of definitions, the mud ahead for social democracy, intellectual receiver is almost dry. The death of Anthony Crosland, the one in sight to refill it, is a tragedy. In these liberal values that Professor Gould and his colleagues are so anxious to defend, there is a tide of populism and nationalism which in social progress is hindered by philosophical doubts and a mediocre economic growth. The moderate Right face similar pressures.

Yet its essential values remain intact. Higher education and the outside world are not invited to see its rationale underlying its rush to defend them. Against an external threat, where it is not entirely unjust, it is partly both in the number of its partners and its intellectual sophistication that should not sell our souls to this particular Mephistopheles.

LETTERS TO THE EDITOR

Social work admissions at NELP

Sir—Although the Council for Education and Training in Social Work is still in discussion with North East London Polytechnic about the future of the two-year Certificate of Qualification in Social Work courses, following the withdrawal of the polytechnic in first-year places, it would be right to point out to your readers that we do not view the matter in the way Dr Brown describes in his letter (THES, September 9). The council's statement of August 26 gives a full account of the reasons for its action.

In brief, the council's view is that the original decision not to admit the individual student was properly taken under procedures between the polytechnic and the council. The polytechnic and its academic board are presumably bound by such agreements. The agreement may, of course, be changed by mutual consent following selection procedures are found inadequate, but should not be changed, as it were, retrospectively.

Further, the procedures should not be capable of yielding to pressure to admit a particular individual, although it is quite reasonable that there may be a quota for a special group of applicants, provided the individuals within that group meet defined criteria.

We also accept that any admission procedure involves full-time judgments, in the same way as do examination procedures. This is widely accepted and is no reason for such judgments to be set aside. Although the polytechnic's authority in these matters is vested in the academic board, it is difficult to see how that authority can be exercised in practice except by the group of staff who must be seen to have integrity and confidence.

Yours faithfully,
PRISCILLA YOUNG,
Director,
Central School for Education and Training in Social Work.

Sir—Your leader of September 2 concerning admission of Mr. S. Vyas in the CQSW course sets out many of the facts quite fairly. I need in clarity my personal position, and wholly in sympathy with Mr. Vyas, and I think that the social work students have acted with less than common sense. Their professional judgment, which I respect, is that Mr. Vyas would not make a good social worker. My problem is that his immediate problem here is actually working as a social worker, think that not only is he a good social worker but a very good one. I respect that professional judgment as well.

Obviously, with such conflicting professional evidence, there is doubt. And since by agreement made about a year ago some places were reserved specifically for people from the boroughs of Barkingside, Newham and Waltham Forest, I think it is reasonable that he should have been given the benefit of the doubt and admitted in the course. It is in this respect that common sense should have prevailed.

The Central Council for Education and Training in Social Work has a fair point who is not opposing to the course must be under the rules it has approved, and which have the ultimate sanction of the Privy Council. But it is not taken sufficient notice of the Articles of Government of the polytechnic, which give the academic board the final say on admissions. I think it is reasonable that the approval of the Secretary of State for Education and Science. This issue needs sorting out in principle. The central council, it seems, does not sufficiently appreciate that it is dealing with a formally designated polytechnic.

For this reason, among others, I think that the attitude of the Joint Education Committee, which the boroughs concerned is correct, and that of the central council is wrong. I do not think that the JEC is detaching itself from the polytechnic; to the contrary, it is backing it. If other local authorities would do the same, the case I could hardly have chosen two more opposite nouns.

Yours faithfully,
TOBY GRAINGER,
Acting president,
Students' Union,
North East London Polytechnic.

Professor Elton and change in schools

Sir—Professor Lewis Elton writes (THES, September 9): "Unfortunately since the proportion of working-class children reaching higher education has not significantly increased since the war, it is not surprising that the proportion of middle-class students in the balance of the total can increase. This is an artificial impossibility."

Numerically the number of working-class students has greatly increased since before the war, while the relative size of the working class has decreased. Thus a larger proportion of working class children go on to higher education than formerly, considered as a proportion of their class.

Since the war many professions, middle-class occupations have grown over to fill the higher education, architecture, law, and so on, which previously had approximately equal numbers in the middle-class education. Also, before the war in the absence of middle-class students many lower middle-class families could not afford to pay for private schooling and so their children went to public schools, but these higher education, but it is not the expected (leaving class) but that with the availability of grants and a swing to tuition, training for all professions the numbers of middle-class students must increase.

The fact that the proportion of middle-class students has not altered since pre-war, despite these changes would seem to work against Professor Elton's thesis that there has been discrimination in favour of the middle-class student.

problem which Professor Elton raises that by some convenient "blinker" allowance based on an average of widely-varying parameters, arising in a regional survey.

Two points serve to mind one concerning his comments on the fact that students with very few A-level grades nevertheless have a degree. It is, I believe, naive to assume that it "would be wrong or not to them out" in the changing circumstances. It is by no means evident that, in the terms of higher education available, the university is necessarily the best for an individual. A good standard pass in a non-university, or a good degree course, would lead in great many cases to a more useful or a more useful degree course. Many department have for many years been carrying out the kind of adaptations that Elton calls for.

Yours faithfully,
O. S. HEAVENS,
Professor of Physics,
University of York.

Letters for publication should be sent to the Editor, The Times, 1, The Times Building, 11, South Molton Street, London W1P 8DT. They should be as short as possible and the editor reserves the right to cut or amend them if necessary.

CLASSIFIED ADVERTISEMENTS

Universities

NEWCASTLE COLLEGE OF ADVANCED EDUCATION Australia

Newcastle College of Advanced Education is a multi-campus college offering a wide range of courses for those who wish to gain a higher education. The college is located in Newcastle, Australia, and offers a wide range of courses in the fields of Education, Arts, Science, and Commerce. The college is a member of the Australian Council of Educational Research and Training (ACERAT) and is recognized by the Australian Government.

HEAD OF DEPARTMENT OF ART SALARY \$424,504 (re-advertised)

The Art Department has an excellent complement of 26 with appropriate support and facilities. The department is located in Newcastle, Australia, and offers a wide range of courses in the fields of Art, Design, and Architecture. The department is a member of the Australian Council of Educational Research and Training (ACERAT) and is recognized by the Australian Government.

SENIOR LECTURERS SALARY RANGE: \$19,290-\$20,895 (re-advertised)

The successful applicant will be responsible for the Academic Department of the Department of Special Education and the Department of Special Education. The department is located in Newcastle, Australia, and offers a wide range of courses in the fields of Special Education and Education. The department is a member of the Australian Council of Educational Research and Training (ACERAT) and is recognized by the Australian Government.

The successful applicant will be responsible for the Academic Department of the Department of Special Education and the Department of Special Education. The department is located in Newcastle, Australia, and offers a wide range of courses in the fields of Special Education and Education. The department is a member of the Australian Council of Educational Research and Training (ACERAT) and is recognized by the Australian Government.

UNIVERSITY OF GUYANA VACANCIES DEPARTMENT OF MINING ENGINEERING

Applications are invited for the following posts in the Department of Mining Engineering:

1. SENIOR LECTURER: Specialise should have at least a Master's degree in Mining Engineering and a minimum of five years' industrial and/or research experience. The successful candidate will be responsible for the Department of Mining Engineering and will be expected to supervise the work of the department.

2. LECTURER: Applicants must possess at least a first degree in Mining Engineering and be eligible for membership of a recognized professional engineering organization. The successful applicant will be required to lecture in Geology and Mining Engineering and will be expected to supervise the work of the department.

SALARY SCALES (per annum) Senior Lecturer: \$12,000 to \$14,000. Lecturer: \$8,000 to \$10,000.

Applications should be sent to the Registrar, University of Guyana, P.O. Box 33, Georgetown, Guyana. The closing date for applications is 15th October, 1977.

BRADFORD UNIVERSITY

Applications are invited for the following posts in the Department of Mining Engineering:

KELVIN GROVE COLLEGE OF ADVANCED EDUCATION BRISBANE

Kelvin Grove College of Advanced Education is an autonomous, multi-campus college specializing in the preparation of pre-school, primary and secondary teachers. It offers a wide range of in-service courses for teachers which include a one year degree programme.

LECTURER/SENIOR LECTURER IN MATHEMATICS

Applications are invited for the position of Lecturer/Senior Lecturer in Mathematics. The successful applicant will be responsible for the development of a research project relating to research in Mathematics.

LECTURERS SALARY RANGES: LEVEL I \$14,345-\$16,420. LEVEL II \$12,345-\$14,420.

The successful applicant will be responsible for the development of a research project relating to research in Mathematics. The department is located in Brisbane, Australia, and offers a wide range of courses in the fields of Mathematics and Education. The department is a member of the Australian Council of Educational Research and Training (ACERAT) and is recognized by the Australian Government.

SENIOR LECTURERS SALARY RANGE: \$19,290-\$20,895 (re-advertised)

TORRENS COLLEGE OF ADVANCED EDUCATION

PRINCIPAL LECTURER IN Technical and Further Education

Responsibilities include teaching, organising research, planning and developing new courses and generally providing academic leadership in teacher education for Further Education lectures. The successful applicant should have demonstrated outstanding professional performance and should have high qualifications in one or more of the following: Academic studies and/or research, with particular reference to post-secondary studies—philosophical, Educational, Educational Administration, Educational History. Some work experience in industry and commerce and/or teaching in Technical and Further Education is essential.

The Academic Secretary, Torrens College of Advanced Education, Holtzhaus Road, Underdale, South Australia 5032 to reach him by October 17, 1977.

The European University Institute is looking for an administrator of university level for its academic affairs department. The person wanted should have several years' experience in the area of university administration.

He/she will be responsible for providing the secretarial services for the Academic Council, drafting documents for it and for the High Council of the Institute, organizing the recruitment of research students and producing the annual prospectus, etc.

He/she must also be able to draw up regulations. International experience would be desirable, to facilitate the necessary contacts with the administrations of the various EEC countries.

He/she will work in close collaboration with the other departments, under orders from the Secretary and the Principal.

A thorough knowledge of at least two of the Institute's official languages (French, English, German, Italian, Dutch) is required.

Basic salary: approx. Lit. 1,300,000 after deductions; the exact figure will depend on professional experience and family circumstances.

Those interested should send a detailed curriculum vitae, along with a photo, directly to: The Secretary General, European University Institute, Badia Fiesolana, Via dei Roccettini, 5, 50016 San Domenico di Fiesole (Firenze)

Closing date for receipt of applications: within 30 days of the appearance of this advertisement.

TASMANIAN COLLEGE OF ADVANCED EDUCATION

As part of the rationalisation and reorganisation of post-secondary education in Tasmania, the Tasmanian College of Advanced Education is relocating its major administrative functions at the Newburgh Campus in Launceston, a city of 70,000 population set on the banks of the River Tamar. Housing is readily available at moderate prices so to transport to Launceston by frequent air services.

DIVISION OF EDUCATION SERVICES

Within the T.C.A.E. two separate Divisions of Education Services include a variety of activities including the Maintenance Centre, A.V. Production, Student Graduation and Housing, Computer Services and the External Studies Unit.

Head, Division of Education Services

Salary: \$20,153.00 p.a. The Head of the Division will have responsibility for the direction and management of these services over the whole scope of operation of certain responsibilities to a local head at the Mt. Nelson campus. The Head of Division should be a person with a broad understanding of those functions in an academic institution, and a strong background in management in tertiary institutions and the ability to work with a wide range of academic staff.

Head, Education Services, Mt. Nelson Campus

Salary: within the range of \$23,643.00-\$28,407.00 p.a. The person will be responsible to the Head of Division for the operation of the divisional units on the Mt. Nelson campus. It is desirable that the person should have specialised in one of the major areas of responsibility such as Library Services or A.V. Production. Enquiries about the above two positions should be made to Dr. Robert A. Taylor, Principal, T.C.A.E., Launceston, Tasmania 7200. Tel. (003) 26 1844. Written applications, which should include the names and addresses of three referees, close with the Personnel Officer of the T.C.A.E., P.O. Box 1214, Launceston, Tasmania, Australia, on 17th October, 1977. Tel. (003) 26 1244.

MOZAMBIQUE EQUADOR MORGANE UNIVERSITY FACULTY OF EDUCATION

Applications are invited for the post of Lecturer in Education. The successful candidate will be responsible for the teaching and supervision of students in the Faculty of Education. The post is for a period of one year, renewable for a further year.

FRANCE THE ECOLE SUPERIEURE DE COMMERCE ET D'ADMINISTRATION DE LYON

4, rue Trudaine 69037, Clermont-Ferrand Cedex, France. Requires for January, 1978, 120000 francs per annum. The person will be responsible for the teaching and supervision of students in the Faculty of Education. The post is for a period of one year, renewable for a further year.

Initial two-year contract with a salary of 1,200,000 francs per annum. Applications before October 20th.

NOTICE BOARD

Chairs

Mr Alvin King, lecturer in the faculty of economics, Cambridge and director of studies at St John's College, has been appointed to the Esmond Fairbairn chair of Investment at the University of Birmingham.

Dr H. M. Crawford, Reader in Botany, University of St Andrews, and Fellow of the Royal Society of Edinburgh has been promoted to a personal chair.

Dr D. E. R. Watt, senior lecturer in zoology at St Andrews, has been promoted to a personal chair.

Professor P. K. Pugh has been appointed to the chair of mathematical economics in the University of Birmingham, from next June. Since 1975 he has been professor in the economics department of La Trobe University, Australia.

Professor B. H. Hundy has been appointed professor and head of the Cranfield Institute of Technology's school of production studies. Professor Hundy joined the Institute in 1972 as professor of automobile manufacture.

Professor V. Alan McClelland has been appointed to the chair of educational studies in the University of Hull. He has been professor of education in the University of Ireland and head of the department of education at University College, Cork, since 1969.

Mr Michael Chesterton, currently senior lecturer in law at the University of Warwick, has been appointed to the chair of law in the University of New South Wales. He will take up his post in January.

Forthcoming events

Regional Conference "Risk in the 1970s", organized by the Victorian Studies Centre and the department of adult education in conjunction with the Victorian Society will be held at College Hall, University of Leicester, Knights Road, Leicester LE2 2TH, from September 22-25. Speakers include: Professor Quentin Bell, University of Sussex, Mr J. Dearden, Director, The Riskin Galleries, Benthams School, and Professor Luke E. Reynolds, University of Leicester.

Appointments

Universities

Nottingham
Special professors: S. S. Adams (Pharmacology); R. E. Beard (Industrial Economics); J. K. A. Blandford (Historical); T. Lewis (Applied Entomology in the department of physiology and environmental studies). Special Lecturers: J. E. G. Barnett (Biochemistry); A. B. Wilson (Applied Biochemistry).

General

The Institution of Electrical Engineers for the year 1977-78: Mr John Ferguson, consultant, has been elected as president of the Institution. Professor Frank Bessent, head of electronics and electrical engineering, has been elected chairman of the electronic chairman management division. Mr Frank Bourne, systems technical manager, Central Electricity Generating Board, has been elected chairman of the control and automation division. Mr Charles May, director of research, the Post Office, has been elected chairman of the electronic division. Mr Donald J. Miller, director of engineering, South of Scotland Electricity Board, has been elected chairman of the power division.

Grants

Leicester
AIDS Commemorative—£69,000 from the World Association for Christian Communication for a study of mass culture for research at the Institute of Education in the Third World, under the direction of Professor J. D. Hattaras.

London
Society of Education—£24,322 from the SSRC for research at the Institute of Education in pupil identities and teacher strategies within mixed ability curricula, under Mr W. B. Davies.

Oxford
Earth sciences—£69,000 from the Ministry of Overseas Development to carry out research into mineral deposits in the Oman Mountains and examine the geological features of the area, in collaboration with the Overseas Division of the Institute of Geological Sciences.

Southampton

Mathematics—£25,597 from the SSRC for analysis of data from complex surveys, under Professor T. M. F. Smith and Dr U. Hull.

York
Psychology—£22,687 from the AHC for a study of recent memory in pigeons: a behavioural and physiological analysis using hyperstriatal and poststriatal lesions.

Noticeboard is compiled by Patricia Santine and Mila Goldie

THE NUFFIELD FOUNDATION

Grants for Educational Innovation

Applications are invited for grants of up to £2,500 to support educational innovations in undergraduate teaching at universities, colleges and polytechnics.

Assistance with the introduction of new courses, the development of audio-visual and other teaching materials and the evaluation of existing and novel courses all qualify for support under the Foundation's Small Grants Scheme for Undergraduate Teaching.

The scheme was first introduced in 1975, since when grants totalling £189,000 have been awarded.

Applications received by 31 October 1977 will be adjudicated during December. Particular attention will be paid to the originality of proposed innovations and the likelihood that they will be of value in institutions other than those primarily concerned. This scheme is only open to applicants from institutions within the U.K.

Application forms and further details can be obtained from the Director of the Nuffield Foundation, Nuffield Lodge, Regent's Park, London NW1 4RS.

STUDY AT HOME

Wolsey Hall offers correspondence courses for students who prefer to study at home. Courses are available in a wide range of subjects including:

- Accounting
- Business Administration
- Computer Studies
- Education
- Engineering
- Health Studies
- Law
- Life Sciences
- Mathematics
- Medical Studies
- Physical Education
- Psychology
- Science
- Social Studies
- Theology
- Writing

For more information, contact Wolsey Hall, 100, The Quadrant, London W1P 9JL. Telephone: (01) 493 4411.

BOOKS

The taxman cometh

The State of Taxation
by A. R. Prest, C. Clark, W. Elkan
Macmillan, £1.95
ISBN 0 333 19657 5

The Economics of Taxation
by J. Field, M. Meacher and C. Pugh
Allen and Unwin, £3.95
ISBN 0 04 335031 8

That even after the introduction of graduated contributions their total effect is regressive because of the upper limit that is imposed on them. Part of the increased direct tax burden on the poor is therefore the result of a shift from less visible to more visible forms of tax. That, paradoxically, may have been a good thing because it has brought into the open the evident absurdity of taxing these lower the supplement target benefit level, of government to those families with the one hand and setting up an associated tax structure to tax them with the other.

Overall the tax structure is not progressive. Tax policy is working counter to social policy. These are the main points which the authors of this book consider. They are three very different books: the first is an essentially extended political argument about the levels and burdens of taxation, the last is a detailed account of the Institute of Economic Affairs.

The City University is offering a postgraduate diploma in public administration and social sciences, politics and economics, law and archaeology, science and philosophy and religion, and special interests. Further details from Adult Education Centre, 100, The Quadrant, London W1P 9JL, telephone 01-254 4322.

Synoptic

The Economics of Planning by R. Kerry Turner and Clive Cullis
Macmillan, £1.95
ISBN 0 333 19657 5

The Economics of Socialism, third edition by J. Wilczynski
Allen and Unwin, £3.95
ISBN 0 04 335031 8

Each of these fairly short books has an ambitious title, and neither can pretend to offer a comprehensive treatment of its subject.

The Economics of Planning is one of the best of Macmillan's series Studies in Economics which, according to its editors, seeks to provide "short, reasonably critical overviews of developments in selected areas of economics". It begins with a taxonomy of planning systems, and then devotes two chapters each to the theory and practice of socialist planning and practice of indicative planning. There are no conclusions.

The literature on economic planning is diffuse and varied, and an attempt to summarise it in less than a hundred pages, even if it is to succeed, has a clear focus. Instead the reader is here treated to brief synopses of numerous books and articles, and the topics covered range from Marxian economic theory and Soviet economic organisation to the role of insurance in the theory of indicative planning and differences between the successive five-year plans in France.

As a result the book is overloaded, with little sense of an organizing principle. This could have been provided by the opening taxonomy of planning systems, which divides them into two classes: "empirical" (i.e. observed in practice) and "theoretical" (i.e. proposals). However, the principles of classification are rather cryptically expressed and the whole classification scheme presupposes a knowledge of much of the material covered in subsequent chapters.

The section on socialist economic planning is surprisingly good. The chapter on theory describes models aimed at solving problems encountered in practice, though the nature of these problems does not become clear until the following chapter. The authors' uncertainty about the historical background are usually too brief to be enlightening. They fail to distinguish industrial and production associations in the Soviet Union, and the passage on page 34 on this is a computer model for planning is seriously misleading, based upon outdated western sources. Indeed there are no references in works other than English and the authors appear to rely entirely upon the sources listed in the bibliography. The authors' experience of planning is in non-English speaking countries; as the final chapter shows, Britain's unsuccessful attempts at planning in the sixties drew heavily on the French model.

Although the second half of the book, on indicative planning, is better than the first half, the Economics of Planning cannot be recommended either as an introduction to the subject or as a survey for students already having some acquaintance with the field. There is scope for surveys of more economic planning (of the Marxist type) but the authors' lack of interest in alternative resource allocation procedures (for instance), but the Economics of Planning does not meet the objectives set by the editors of its series.

Professor Wilczynski's Economics of Socialism is the third in a series of textbooks on centrally planned economies. Wilczynski is a prolific writer with a wide knowledge of the USSR and Eastern Europe. The book is straightforward and clearly organized with a useful bibliography. Wilczynski makes comparisons throughout between Marxist principles and practice in the USSR and Eastern Europe, and a valuable reader may find this a welcome feature. But not so convincing, for example, on page 69 he suggests that the commitment of the socialist countries to industrialization is unwarranted, and deserves to be widely expected, as "originally Marxism was a protest against the industrial Revolution".

Economics from Oxford

The Inequality of Pay

Sir Henry Phelps Brown
Why does one person earn several times as much as another? The economist's answer relies mainly on the principles of supply and demand in the labour market, whereas the sociologist finds more significance in the differentiation of the labour force by class, status, and power. This book examines both ways of accounting for the inequality of pay, and uses the insights gained to assess the possibilities of achieving a more equal society. £7.95

Economic Perspectives

Further Essays on Money and Growth
Sir John Hicks
During the last ten years Sir John Hicks has published three books - *Critical Essays on Monetary Theory*, *A Theory of Economic History*, and *Capital and Time* - the originality and significance of which have been widely recognized. Their theoretical preoccupations have been brought together in this volume of new and reprinted essays. £5

Inflation, Exchange Rates, and World Economy

W. M. Corden
Inspired by the dramatic economic events of the years 1973-5, this book extends some of the new thinking of those years. Four central topics in international monetary economics are subjected to theoretical analysis: balance-of-payment theories, old and new; inflation and exchange rates; the international adjustment of the oil-price rise; and monetary integration in Europe. £4.50

The Joyless Economy

An Inquiry into Human Satisfaction and Consumer Dissatisfaction
Tibor Scitovsky
'Altogether this is a brilliant contribution to welfare economics which, if it becomes as influential as it deserves, will give that subject a content which actually corresponds to its name.' So wrote *The Economist's* reviewer when this book was first published in 1976. Now issued in paperback, it offers a far-ranging critique of the affluent society and the pursuit of material happiness. Paper covers £1.95. Galaxy Books

BOOKS

Change in technology

Innovation and Productivity under Nationalisation
by C. Harlow
Economic, Technical Change
by A. Heertje
These two useful books on technical change are very different, for while Heertje provides an essentially theoretical text in which focus is on the innovation process in the nationalized system and introduces a theoretical framework very much as a postscript.

Pride and pugnacity

The Economics of European Imperialism
by Alan Hodgart
Imperialism is an eminently complicated, emotionally charged topic, which of general significance is an understatement of the world of the links which discuss it are plentiful and the number of students set to attempt to answer questions on it must be legion. Disagreement about what it is and what constitutes its historical dynamics is profound and, between certain camps, almost certainly irreconcilable.

BOOKS

Monetary matters

Inflation, Exchange Rates, and the World Economy
by W. M. Corden
The technicalities of the effect of the oil price rise are discussed in three separate chapters. Two principal parts are, first, the five-fold increase in the price of oil was not necessarily inflationary for the industrial countries. Indeed, the higher price of oil was deflationary because it induced a massive switch of expenditure on to this commodity.

A decade of aid

but the wealth of detail there would have seriously divorced the section on general aims of aid donation from the conclusions as to its benefits.
Jones has achieved two worthwhile goals in this carefully written and researched book. For those interested in the former High Commission Territories there is here a source of information which is difficult to obtain from any one existing work.
